PHOTO INTERPRETATION BRIEF

Title: Possible Antimissile Missile Training Facility at the SAM Training Facility C-06, Leningrad, USSR	Geo Coords: 60-07-10N 30-59-20E	COMOR No: None	Publication No: NPIC/R-101/63
	NPIC Target No: 0103-50-F1	BE No: None	Date: June 1963

A possible AMM training facility is co-located with the previously reported Leningrad SAM Training Facility C-06 on the west shore of Lake Ladoga, 21 nm northeast of Leningrad.

First usable photography of the area was dated [REDACTED] at which time the facility was present. The facility consists of a curved structure, similar to the curved structures at the Leningrad Probable AMM Complexes, measuring approximately 105 by 70 feet. The side walls are arcs of circles with radii of 180 and 250 feet, respectively. The curved structure is on an area of ground scarring which appears to be in the shape of a sector of a circle. An adjacent long shed and unidentified structure are probably associated with the facility. Details of the facility were not

discernible on [REDACTED] photography because of snow cover. The structure appeared curved on only [REDACTED] photography. Atmospheric conditions and scale precluded determination of structure configuration on photography prior to the [REDACTED] photography.

Curved buildings at the Leningrad Probable AMM Complexes (see NPIC/R-135/62) measure approximately 110 by 60 feet with side walls on radii of 185 and 245 feet, respectively.
